Weekt w Long Tchm
NBC – AM Radio – Monday
1/10/72 at 8–15 pm

LT: (introd) story of YT meeting Dr. J Lettvin I talked to him this pm, recorded the conversation Haven't yet been able reach Dr. Weekt (telltes). Hope he in touch w him 15–20 minutes – get his views on Lett's findings. Lett is Urologist Studied Assn. Extensively lectures written Extensively including a couple of books (?) 57 yrs age Ch D of US Col U Coll of P&S Has written articles read JS describing series Experiments he did replicating TSBD etc.

Taped interview ⊂ Lattimer

LJ understand your student
assoc & friends & that
is probably why you were
selected?

JL actually is coincidence
but interested in homicides
assoc a JFK Parallels
many ways — wrote article —
then to amount everyone
cit WR wtg & pers
reasons in many cases
Very upsetting being pple
accuse WC & gross untruths
Hoppens was asked be
visiting prof Dallas ⊂
was able sit on bed in
window "where LHO sat"
& seemed easy which
critics argue hard shot
poor rifle too many glasses
missing from bullet
Was able get ID rifle + ID
bullets Gr forms ⊂ 2
Dons did mock up

500 rounds VS 100 by FBI
demo one day 4 pers —
ammo perfectly reliable
rifle " partial
def were able hit target
3 x at same distance
2nr. owned but used
Clear many cases not warranted
But still had damage
by re trajectory of bullet
thru mesh. Skeletal
in NYT. Worrisome
to when was permitted
See actual photos was
interesting see rear hole
clearly entrance quite far
above front hole of exit
That was caused striking
finding Autopsy he
looked 4 was any
sign bullet transverse
direction has cut
no sign of any

LI You are urology. Will you consider yourself xpt also in forensic pathology?

JL No by no means but I do have available xpts in pathology & in Xrays, so I have better capability than ordinary citizen & fact I happen have rifle practice plus he was perfectly competent witness C. + apparent rifle & no telescope

But re forensic xpts 3 leading ones have + already Blue - lobbies by Barrow Clinic

Dg no neglect by american
forensic medicine.

LJ who were the 3?

Lattl Sorry I do not know the
first but I can get it
for you — I was in
1968–1969 NYT
I do not have records

One from U of Utah
" " One Western
> Cleveland one need X
and
Radiologist from Johns Hopkins

They came to generally
same conclusions but
in very technical language
Eg "pulmonary emphysema"
not "air"

LJ any possibility JFK
had Addison's
disease?

Later has touching over shoulder
typical / cartridge by
no ~~blanket~~ — ? —

LJ Then you are satisfied
only LHO ?

JL Yes I am satisfied
c that Bullet
rec Parkland Hosp
right head Oswald's handprint
on it Having trace
Caltrans - recommend
in X to plant at PH
Just foolish to think that
could be done. So clear
LHO fired 3rd
Plus fact to dist Typical
& bullet matching
gun on LHO when
arrested

Earl Rose – tries justify removal of body – but did Cead to fact forensic details were observed – halo and hole in back clearly indicate entry – European forensic community has always backed ashmore

LJ Any value Helpern Wecht Weides Cash?

JL Helpern gentleman in hard Wondering if any of them had done it

(farewell Ameruse)

LT Love to wait to 9 pm news to get Weight – he is giving both to mortician

Weeks 9:15 pm

LJ what you told Mortensen tonight?

CW told not tell layman (Jim Landis)

LJ I told CW JK L

Urologist Student
Assoc Mortensen
will tell you few things
Said
— No don't LHO print all
charts
— Call attorney first when
— Learn student ass by
firearms wounds WW II
— Forbes shooting is
not forensic path
very close friend
was student of Helpern

– Latt feels after y alg Covid all made available at Andrews –
What he saw should illumin
Completely any doubt
re WC & LHO all shots
Would like your comments

LW Quite interesting –
not trying be freedom –
Latt reacts on reflecting
to LHO as if cared till
Jim made who fired
Tempted asked him if
any items he dug had
LHO name on them
Gifts accepted which
Latt feels off ?
LHO was the assn

LJ He did provide with
C paper types Jim
used in TSBD

— he never said same boy
— was able determine he could
— no one but more on boy
He owns LHO's rifle score
both 49 or 50 at
24 distance pass Pages
49 out of 50

W inconsistent ⊂ What is
Known LHO ability
a Marine for final
records did very
poorly — failed
1st x passed
⊂ low score 2nd x

other inconsistencies

Tapes in when read Humes
autopsy protocol & their
test VS subsequent
findings / spec panel
1969 readily
find obvious
semantic equivocation

LJ actually Dr. Rose eminent forensic pathologist — never in this case — that is pt.

W> right H=B = pierce only Smith had gone + H=B more

But pt is, they were pathologists & are on record

Later Mantz Fisher & attys official Rpt also on record

+ it is there unquestionably that findings (this case WB slow hemorrhage = caused by language on certain pts

How follow the autopsy is 100% positive

LJ Left + entering stretch Rasp found pt of entry higher than stretch

W) mild tohe it with hand
Nurse: what about
holes in front & shirt
Did front side go to
JFK head?

LI Left side arm bandage
& brace (black)
OB crotch
upright position
Do X to second bullet

W) 0 to do c it
First shot struck him in
back - face sheet -
during an Express -
at lower part scapula
Later round was
shoulder =
now both moves at
& head

Maybe bullet caused it à
entry hole in head
at occipital protuberance

2nd Halo bruise
back of neck
possible entry

W can be bruising
effect at exit
also Left
skull has not been
forensically fully
examined in NYT as
no gross blood — for
pedro argument only —
only saw front of car
turn around — if actual
both hit neck
same angle

then would go back to floor
if can — not into
back of face

Forensic need
" path

LJ) why B Marshall
select both
if not felt competent
when CW JN
Mtldg avail?

W) very good questions
Answers itself
explain if ask
fact that 3 7 4
path 3 crit
1 mod 1 dependent
if WR

further conviction the
defendant is the
wrongful while
3 patties are not,
at least not so for
LJ not previous
patch who is
presumably to
WR ??

W) was found Rum
Fisher Hunty et al
higher cognitive
→ in essence OK'd
WE finding
on autism
But in factual narrative
they showed divergence
from Humes analysis
→ " test

I used language that
provided [illegible] the board to
recognize certain
things

to more pleased by fact
urologist able
arrive conclusion
which outstanding
FP's unable do

Another analogy re
heart transplants
DeBakey & ~~Cooley~~ Cooley ~~H.M.~~

Academic arrogance
malpractice
Cardinal rule is
MD not learn
[illegible] another
specialty

How dare thrust self
into poetic pantheon
Contrary — —
absolutely incredible !!

LJ
Felt y
Chatt y
avail able?

W Purely !!

Cyril Wecht
